

WHY NOW

The \$6.15 Trillion Question

\$6.15 Trillion — Where It Goes

Gartner, February 2026

Maintenance (75%) Innovation (25%)

Your engineers are plumbers, not architects. 75 cents of every IT dollar goes to patching, vendor management, and keeping legacy systems alive.

Deloitte CIO Survey

Global IT spending reaches **\$6.15 trillion** in 2026 (Gartner, Feb 2026). Yet **75 cents of every dollar** goes to maintenance — patching, vendor management, keeping legacy alive. AI isn't failing because the models are bad. It's failing because **fragmented infrastructure** won't let it succeed.

The Fragmentation Tax

- 95%** of GenAI pilots **fail to deliver business ROI** — siloed data, no observability, no governance. MIT Sloan, 2025
- 72%** of CIOs say **fragmented infrastructure is the #1 barrier to AI ROI**. The models work — the substrate doesn't. Gartner, 2025
- 660** **SaaS apps per large enterprise** (10K+ employees, \$284M avg SaaS spend). 53% of licenses go unused. Zylo 2025 SaaS Management Index
- 27%** of **\$450B+ global cloud spend is waste** — idle instances, over-provisioned VMs, forgotten resources. ~\$17M/yr per large org. Flexera 2025 State of the Cloud
- 94%** of core modernization projects **exceed timelines and budgets**. Complexity kills transformation before it starts. IBM Institute for Business Value
